(Verse)

Oh it don't matter where you are
The rock in this every line
There were no clues to feel to sublime
Let's drip down apart

(Verse)

We just slept to the radio
General as my heartbeat sound
Turn up the fuse all over again...
My friend

(Chorus)

We are... we were DNA
Don't wanna fade away
Rewind the best of yesterday
It's your discovery
This time it's a special place
Let's keep each other warm
Our hearts, now they beat the same

(Verse)

Yea there's a plan that runs along
I've seen with all the bars we've crossed
Look at a wheel that spins around
We fall into one

(Verse)

It ties together with every touch
We're running through the beat of the drums
We are the creatures breaking light
Relax

(Chorus)

We are... we were DNA
Don't wanna fade away
Rewind the best of yesterday
It's your discovery
This time it's a special place
Let's keep each other warm
Our hearts, now they beat the same

(Bridge)

Take me away, so far away

No violence

By that old fire

Just got a choice

We bring on and forth

The time that she put

It's over the horizon

What could be inside of us to gaze on

Carry on

Catching, we're as strong as you

Catching, we're as strong as you

Catching, we're as strong as you

(Chorus)

We are... we were DNA

Don't wanna fade away

Rewind the best of yesterday

It's your discovery

This time it's a special place

Let's keep each other warm

Our hearts, now they beat the same
