Baby you know it's not the way we go
Take me to the place where the hearts grow
Crying and lying won't be satisfying
Give me your lips to kiss, oh oh
And I want you to know, and you know this...

Take me to the place where we used to go
I know that you know where I wanna go
Take me to the place where we used to go
I know that you know where I wanna go

Here my voice it's amplified, understand, it's all so
simplified
Don't tell me your tongue is still tied
Show me the way and tell me what to say
You've given me everything in the past and that's ok
But I want you know, and you know this

Take me to the place where we used to go
I know that you know where I wanna go
Take me to the place where we used to go
I know that you know where I wanna go, WHERE I
WANNA GO YEAH

Take me...
