You'll never return, my saviour  
On every road I walk  
In every way of failure  
With every heart I choke  
There's no place I could be  
Still it's coming down  
Oh, I hope I could sleep with you still around  
There's no way I could be  
Still it's coming down  
Oh, I hope I can sleep, when you're not around  
Be my saviour, in anyone I see  
Burning straight down on me  
In everyone I see  
Be my saviour, in anyone I see  
Burning straight down on me  
Burning straight down on me.
