I can't explain, she's a beautiful rain  
If I could only freeze the drops, you can have all that  
remains

Rivers flow into the sea, but why can't they bring you to  
me  
I want more than to remember  
I wanna hold on to this forever  
They brought me to you

In her blue dress, the light hits her face,

Such a perfect shade  
Every piece has it's place, I guess mine was erased

Rivers flow into the sea, but why can't they bring you to  
me  
I want more than to remember  
I wanna hold on to this forever  
They brought me to you
