Hey,
Keep me from you
I don't want to be around anyone
You are free to let go
Follow slowly

Cold, cold
Heart, heart
X4

Take a step out into the daylight
I don't wanna fight for it all
Have to get it where we fall

You rely on moving the same way
I don't wanna fight for it all
Have to get it where we fall

Hey
I seen your face
Look at me
Light
I'm nothing
I believe in your air
Something is happening
Cold, cold
Heart, heart
X2

Take a step out into the daylight
I don't wanna fight for it all
Have to get it where we fall
You rely on moving the same way
I don't wanna fight for it all
Have to get it where we fall

Cold, cold
Heart, heart
X2

Take a step out into the daylight
I don't wanna fight for it all
Have to get it where we fall.
