

## **Ending This Agony "With This Drink"**

Visit "[With This Drink](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Help me  
I've done something I regret  
How did I let this get to my head  
The pain is too much to handle now  
And everything starts to crumble down

With this drink the pain goes away  
With this drink my friends fade away  
With this drink I lose my family  
It's this drink that takes you away from me

As this pain builds stronger  
The drinks get colder  
Can I save myself from all of this  
Or will I get carried away with my fists  
Misery loves company, and that's where I'm going

With this drink the pain goes away  
With this drink my friends fade away  
With this drink I lose my family  
It's this drink that takes you away from me

With this drink the pain goes away  
With this drink they all laugh away  
With this drink my friends fade away  
With this drink I lose my family  
It's this drink that takes you away from me

It's this drink that takes  
Takes you away from me  
Away  
Takes  
You  
Help me
