And another waiting  
... thousands of days disappear in the fog  
And another dream  
... the gallery of grey faces  
And another forgotten faces  
... it's easy to hurt somebody  
And another pain  
... you even don't know where it hurts

The hands... which never hugged anybody  
The words... which were never said  
The feelings... which nobody showed

Only another rain  
... you can't already recognize rain from tears  
Only another tears  
... hidden behind black mask

Only another masks  
... words of interior over shouted by cold  
Only another words  
... nobody is interested in them  
Only anotherneedless  
... needless words, needless man, needless day

"How can be a man needless?"
