

Enemy You "Younger Days"

Visit "[Younger Days](#)" on MotoLyrics.com

She'll hide away and try so much To escape the void
she cannot touch So far there, years on her own She
never really left that home It's in her head, the things
he said in younger days, unhappy days Seeing him,
these innocent eyes She couldn't stop him if she tried
Now with every boy she takes to bed she feels
something she never had It's in her head, the things he
said in younger days, unhappy days It's in her had, the
things he did To just a girl, his little girl And days are
waning But now the past is gaining In the darkness
something's coming From him she's still running And
every day she's trying Fool us, never crying Smiles at
what she's doing Being used, or is she using ? It's in
her head, the things he said in younger days, unhappy
days It's in her had, the things he did To just a girl, a
frightened girl This frightened girl, She's just a
frightened girl
