Enertia
"If I Were You"

There is no reason for this evil
That lives in sickened minds
To take a life and not think twice
About the pain you've left behind
Without a care you shred and tear
Innocence lost to a maniac's cry
I'm turned on and so pissed off
So many will suffer from your state of mind
You look right through my mind and i want to feel your
fear
For the lives you have destroyed, the punishment will
be severe
If i were you
There would be no shame
On your life
I would make my claim
I'd pay back the hell
You put me though
That what i would do
If i were you
Midnight feeds on the shadows
That are stalking me
Here i lay wake and praying
No matter if i beg or plead
How will i stop this torture
Of my brain, my mind, my soul
Are you man or monster
Has madness taken it's toll

I would make you suffer
My vengeance slow and true
Take the tears i cannot hide
And force my grief on you
Matching my anger to your fury
I'd show you just how it feels
Take you on that same twisted road
Until you understand my pain is real
My eyes burn right through you
All your fear is all you feel
For your life has been destroyed
And your punishment will be so real
If i were you

There would be no shame
On your life
I would make my claim
I'd pay back the hell
You put me though
That what i would do
If i were you
If i were you
There would be no shame
On your life
I would make my claim
I'd pay back the hell
You put me though
That what i would do
If i were you
If i were you
If i were you
