"Falling Star"

Visit "[Falling Star](#)" on MotoLyrics.com

Is this how it ends
With a box of photographs in the closet

Is this how it ends
To fly away right in front of me

Is this how it ends
A falling star crashes in the ocean

Is this how it ends
It falls apart right in front of me

As the fog is lifted I can see with clarity
The machine it falls apart if not put together well

Is this how it ends, like falling stars crashing in the
Ocean
Is this how it ends, a fading light burning with the

Fallen you

As December rain falls, a discovery was made
Other paths were chosen
Somehow lost we'll find our way

Is this how it ends like falling stars crashing in the
Ocean
Is this how it ends a fading light burning with the
Fallen you

And you looked away
Moving closer faster
Speed of light it hurts my eyes
Moving farther faster falling stars in the sky
