When I hold you in my gaze, when there's nothing else  
to say

I can still find you when you look away

You can say to me we're thru, you can say that you are  
free

But you fool yourself, you belong to me

The more you wanna run, you can't make it to the door

Took a chance on love, now we both want more

Chorus:

And tonight goes on forever

I can feel it in my life, I can see it in your eyes

Going through this world together

Finding paradise with you, into the savage blue

The savage blue with you

When the storm has passed us by, and the crowd has  
come and gone

I will be with you, 'cos our love goes on

And we share a quiet place that no one else can touch

Spirits live as one, and our souls are free

I will wait for you, now my heart's an open door

Tell me that you'll stay, don't wanna lose you anymore

chorus

(Instrumental break)

Baby come with me

chorus

(Tonight goes on forever) When I'm alone with you

(Tonight we are together) Oh yeah

(Tonight goes on forever) Into the savage blue

(Tonight goes on forever) When I'm alone with you

(Tonight we are together) Makin' love to you

(Tonight goes on forever) Into the savage blue

(Tonight goes on forever, tonight we are together,  
tonight goes on forever)

(repeats out)
