I remember my father told me  
About good things in life  
My mother showed me how to reach for the sky  
They predicted me a great time to come  
And what the future has in store for me

But now I know it is not so easy  
To walk through this world  
Senseless jobs early in the morning  
Just to survive  
How can I understand the message from you  
Your kind of future won't come true

I don't listen not you - I will walk my own way  
My life is now - yours yesterday

This is my life, disappointed  
Don't wanna hear your lies I know the truth

I dreamed of you, I dreamed of me  
I dreamed a thousand times, there's nothing left  
To say - forgive me  
Please believe me, I will show you  
That I really know which way to go,  
Independence is not only a word
