Navigation by the fires of the dead world  
Towards the shores of Reogenesis

Navigation by the fires of dead worlds  
Towards the shores of Reogenesis

Distant self now cut through, approaching infinitely  
Racing hearts throbbing deep beneath the painted  
bones  
Mars opens the hidden doors to Venus  
Lunar flight crashing into solar storms  
Blinding unification - vertigo - ecstatic curtain fall  
Get ablaze by inner arson, endlessly reborn  
Winds, oh the winds that speak of your salt and blood  
Break open the dam, flood the deserts

Shocking white pulsar radiant dreams drawn in night  
sky  
Ice-glazed branches undead by rays from an  
impossible sun  
Crystallized pathways towards runic chambers  
concealed within the microcosmos  
Revert away from the predicament, flee across the  
abyss

Severing the fetal cords spawning fusions by the  
thousands  
Through bent space created black channel - pagan  
relay  
Sensations of flesh flickering  
Praising death through bleeding eyes
