(Lyrics by Nornagest)

Beyond the fields of impurity, across the infernal seas,
stand the land of silent obscurity, the land of
Ardennes,
beyond the black gates of the fagnes infinite kingdom
whee the perfect
starry sky of night rules.
Funeral winds embrace me, their whispers teach me.
the mystic rituals of damnation.
Follow our way, follow our path.
Spiritual brother in dead's land.
Where the black gate stand,
where hatred spirits were invoked.
Be aware of your demonic convention.
Beyond my land of hate, beyond the seas of frost.
I summon the demons of the pits to deny forever, the
Cross of Christ

Desecrate the holy spirit for beyond and beyond...
Oooohh God! See the dusk of HECATE,
the dusk of forgotten souls
SATAN! Father of the dark dawn,
black angel oppressed by the light,
hear our calls!!!
The call of the true worshippers, summoners of the
hatred dusk.
Dusk of the forgotten darkness, warriors with invincible
swords.
Hordes of a thousand blades, fighters of the divine
light.
As dusk of the forgotten darkness rise again...
