

Enzyme Dynamite "Robo Girl"

Visit "[Robo Girl](#)" on MotoLyrics.com

We are living in the future , the age of the computer .
Put me into your life, download my love tonight.
The prototype of a perfect chick , switch your status to
relationship
Megapixels picture perfect, you found my microchips.

I told my momma imma build a robot
To love me all my life , Imma work so hard every day
and every night
for the female prototype.
I got them pieces to build my robot.
Starting with heart, lips, and eyes.
My robo girl won't you open up your eyes.

She is my , my beautiful creation (whoa , whoa , whoa)
She is my , my beautiful creation (whoa , whoa , whoa)

We are slaves to technology, true love will set us free,
it'll set us free.
Virtual reality create my fantasy , my fantasy
We are slaves to technology , true love will set us free ,
it'll set us free
Virtual reality create my fantasy , my fantasy .

I told my momma imma build a robot
To love me all my life , Imma work so hard every day
and every night
for the female prototype.
I got them pieces to build my robot.
Starting with heart, lips, and eyes.

My robogirl won't you open up your eyes.
She is my , my beautiful creation (whoa , whoa , whoa)
She is my , my beautiful creation (whoa , whoa , whoa)

And now me and my robogirl live in a big house.
With a white picket fence in the front and the kids
running around
playing dodgeball
(x7)
