The word is us  
Seduced by decivier  
Path fullled with abhorrence  
I refuse to walk  
Mankind label, you will born with frailty and dishonor  
Everybody waits for redemption, but no one will  
Truce with contempt, triumph invoked disgrace  
The deviant route is outside your code

Deliverence from humanity  
Fells different, lot more free  
Damnation my sentence  
Nocturnal silence

Deliverence from humanity  
Feels different, lot more free  
Be your own savior!

Never, never, never surrender  
Dismantle humanity  
You will feel a lot more free

This mare, our end to existance  
Buried inside all, in the core

Mankind torture, gave me power  
Mankind torture, you will feel  
Mankind torture, in every cell  
Mankind torture, of your body
