Stumbling around in the haze
My head is all out of phase
And I keep learning
The hard way
And giving it one more day
Then all of a suddenÂ...

It came to me
It came to me
It came to me
It came to me

And the light broke
And the sun shone down
And illuminated all my doubt
I think I got it now
It just came to me

It was all black and white
Until I saw through
The spectrum of truth
IÂ'd really love to show you the answers

Epiphany, she donÂ't take no cues

There ainÂ't nothing you can do
When the timing is right, itÂ'll come to you
There ainÂ't nothing you canÂ't do
When itÂ's right HeÂ'll come to you

It came to me
It came to me
It came to me
It came to me

And the light broke
And the sun shone down
And illuminated all my doubt
I know I got it now
It just came to me
