Baby listen to me, these are words I need to say
Words to pay attention to, words to change your way
You hold me in frustration, and I never know your
Thoughts
Don't know when your coming back, well it's time I
Found support

I found someone, to light up my life, while you're gone
I found someone, to light up my life, while you're gone

Baby listen to me, I can't take much more of this
When I tried to open my mind, you seal it with a kiss
You take my love for granted, and it can't go on that
Way
So now I take back what is mine, there's nothing you
Can say

I found someone, to light up my life, while you're gone

I found someone, to light up my life, while you're gone

She is there when she is needed, and she's more
Beautiful than you
Keeps my mind occupied, when the hurt's making me
blue
She knows just how to touch me, and she always gets it
Right
Giving all her best for me, while I'm missing you
Tonight

I found someone, to light up my life, while you're gone
I found someone, to light up my life, while you're gone
I found someone, to light up my life, while you're gone
I found someone, to light up my life, while you're gone
I found someone
