"Heart Factory"

Visit "[Heart Factory](#)" on MotoLyrics.com

We're manufacturing hearts we've got the perfect thing
the word on the street we've got the new love machine
heart with and on/off switch and a remote control
now you can program how you feel before you walk out
the
Door
well you can leave 'em hot and you can leave 'em cold
and you can give 'em what you want and you can get
up and
Go
and you can take your heart out and you can put it back
in
i think we found the way to put the fun back in sin
it's not like an organ more like valentine
it's cherry cherry red and it beats on time
we're trying to reduce the heart on heart crime
you bring your heart to us we'll get it purified
what are you waiting for?
