Uh oh, uh oh  
We went back-a-wards  
Directionally impaired  
Those were your words

Oh I was sober  
But to drive I wasn't fit  
And the road came up so quickly  
The road came up so quick

Uh oh, uh oh  
We went side-a-ways  
Past everything we ever made  
Parking lot full of mistakes

My head was dizzy  
But the steering wheel was square  
Oh, it wouldn't take me where I wanted  
Wouldn't take me anywhere

Oh and I was blind to your design  
You had it planned out all the time  
(Back and forth is the way way I'm going  
If you want, I could give you a ride  
Drive around all night  
You hang out the side  
Tune me out just like radio)

Uh oh, uh oh  
We went no-oh-where  
Can't release the brake  
Stalled and it was too late

My day was vacant  
And you came to fill it in  
But my whole world would be shaking  
If we said what we were thinking

Oh and I was blind to your design  
You had it planned out all the time  
(Back and forth is the way way I'm going

If you want, I could give you a ride  
Drive around all night  
You hang out the side  
Tune me out just like radio)

I believe you'd fall  
I believe you'd fall

Oh and I was blind to your design  
You had it planned out all the time  
(Back and forth is the way way I'm going  
If you want, I could give you a ride  
Drive around all night  
You hang out the side  
Tune me out just like radio)

I would walk those three-thousand miles to you  
I'd walk them every step  
But would you be there when I get there  
Will you be there 'til the end?  
(Drive around all night  
You hang out the side  
Tune me out just like radio)
