Back in the day, before there was love
before there was us, before I knew what
it really meant to have me somebody
who's really there giving there all for me
back in the day, I didn't know none
before we was one
I learned on the run
what it would take to keep our hearts happy
straight to the end can't let this chance pass me
baby we made mistakes but I see just what it takes
the last thing i want us to make is steps that we'll take
us far from our fate
girl how can something so clear just push back
something so near
Now I don't want to be cause of your tears,
your worries your fears should all disappear

there's no need to worry
just that I am ready
even when I'm away my heart
stands right back here with you
whenever you call girl my heart reaches back for you
no matter how far away
my heart runs right back to you

back in the day I would have jsut ran
but now here I stand I'm amking these plans

what's in a day if you're not my future
why give these words if they do not move you
I wanna just build, I wanna just heal
(?) it feels, when out on the field
most of my boys think that I've gone crazy
cause since I met you none of these girls phase me
baby it's you I hold, lately it's hard to let go
it's crazy even when I know that I just have to go I can't
pull to the door
I know it has to be love
you fell down from above
as if you came down here just for me
to somehow help me see
how heaven can be

chorus

Bridge

More ever more

You will find so much love (?) in me

I've learned to love

take your time so that you can see you can trust in me

So Baby, won't you lay back

My lady, won't you relax

I got you, take care of that

your front to your back

your sides and all that

all that is mine

what comes to mind

put those behind

love your design

(?) rewind
