Something amazing, contagious can feel what I feel  
I got the clouds on the ground and I don't know if this is for real

We do what we gotta do  
Got a first class seat ticket to the moon  
And the stars not far away-ay  
Never cared about what they say

We do what we gotta do  
Got a first class seat ticket to the moon  
And the stars not far away-ay  
Never cared about what they say

We're watching the stars  
But not from a far  
It feels like the sky falls down  
My heaven's around  
Right here on the ground  
It feels like the sky falls down

Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up

I'm not flying away, gravity brings me back to the ground  
I do what I want and I got what I need to stay down

We do what we gotta do  
Got a first class seat ticket to the moon  
And the stars not far away-ay  
Never cared about what they say

We do what we gotta do  
Got a first class seat ticket to the moon  
And the stars not far away-ay

Never cared about what they say

We're watching the stars  
But not from a far  
It feels like the sky falls down  
My heaven's around  
Right here on the ground  
It feels like the sky falls down

Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up

Happily, fly away, no gravity  
Full free soul's what I'd rather be  
[?]  
So take turn we never learn  
In charge for capacity  
And we magnify the stars  
They around so we never travel far  
Like a broken [?]  
Let the sky fall down  
Up in here like you I'm outta my mind

We're watching the stars  
It feels like the sky falls down  
My heaven's around  
It feels like the sky falls down

We're watching the stars  
But not from a far  
It feels like the sky falls down  
My heaven's around  
Right here on the ground  
It feels like the sky falls down

Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up  
Don't need to bring it back up-up-up-up-up
