(Christine Bendebel)

I dream of Christmas
I dream of you
I dream of all the holidays
That we've been through
The cold December nights
The way you hold me tight
Under the mistletoe we'd kiss
And the world would be in the state of bliss

I dream of Christmas
I dream of you

I think of all the love we've shared all these years
We'd light the Christmas tree
While the carolers are singing
And bells would be ringing
Because of all the love that you've been giving

Christmas and you
Should always be together
I'll spend Christmas with you
In any kind of weather
You are the reason
For my wonderful season
When I dream of Christmas
I dream of you

I dream of Christmas
I dream of you
I dream of all the Christmas's that we'll go through
Santa's bringing holiday cheers
To all the little children
While you bring me joy
You're my gift, you're my joy
