Try a run, try a hide
Escape your only truth, for a while
Live the past, create a picture, it won't last
A million colours to a lie, it won't last

[X2]
When the sun is cold and black
When you wanna scream and shout
And the record plays the dark side of the moon

Brighter days, on a distant shore
You realized it's steep, to the top
Never fight, a never win reality
A million colours to a lie, that will fade

[X2]
When the sun is cold and black
When you wanna scream and shout
And the record plays the dark side of the moon

[X4]
So good... let me lose myself...

[X3]
When the sun is cold and black
When you wanna scream and shout
And the record plays the darkside of the moon
