Try a run, try a hide  
Escape your only truth, for a while  
Live the past, create a picture, it won't last  
A million colours to a lie, it won't last

[X2]  
When the sun is cold and black  
When you wanna scream and shout  
And the record plays the dark side of the moon

Brighter days, on a distant shore  
You realized it's steep, to the top  
Never fight, a never win reality  
A million colours to a lie, that will fade

[X2]  
When the sun is cold and black  
When you wanna scream and shout  
And the record plays the dark side of the moon

[X4]  
So good... let me lose myself...

[X3]  
When the sun is cold and black  
When you wanna scream and shout  
And the record plays the darkside of the moon
