Girl came through, the light skin honey with the  
cinnamon smell  
Girl was so enticing, baby, make a nigga choose hell  
Momma hopped up on cocaine  
Daddy on space ships with no brain

Sister gone numb, the pain the same  
Why same DNA cell  
She was turned out on shine new things  
(Diamond gold chains, diamond gold rings)  
Center-fold spread, she trying to do things

See, she be on that cough syrup in coke cans  
20-inch-rim-man with no land  
Her pussy gone numb, the pain the same  
Why same DNA strand

We're not well  
We're not well  
We can't tell

Brenda done died with no name  
Nickel bag coke to the brain  
Will they ever find the vaccine?  
Shitty, damn, damn, baby, bang

Rich man got the double barrel  
Po' man got his back to the door  
Code white stands for trouble  
Shots from the po-po
