

## Escape The Fate "Guillotine"

Visit "[Guillotine](#)" on [MotoLyrics.com](http://MotoLyrics.com)

So lock and load mercenaries  
i see the smoke from the hilltop  
they march one by one  
the battle starts adversarys  
they bathe in our blood  
the worst is yet to come  
weve reached the covenant  
to kill what we have started  
kill the machines weve spawned to fight  
in the darkest hour

they really need to know  
we really gotta go  
we fight to live we fight for pride  
we wont back down the weak dont survive

[chorus]  
we stay here tonight  
dont let them find us or were dead  
promise me you wont leave my side  
the warmest place to lye my head  
and when the sun comes up we fight  
dont let them find us or were dead  
so promise me you wont leave my side  
trace this blood back to there grave

the smoke has cleared

thousands are destroyed  
they send signals no salvation  
they fight in lockout scope is ready to go  
armed with explosives spartans stand alone

they really need to know  
we really gotta go  
we fight to live we fight for pride  
we wont back down the weak wont survive

[chorus]  
we stay here tonight  
dont let them find us or were dead

promise me you wont leave my side  
the warmest place to lye my head  
and when the sun comes up we fight  
dont let them find us or were dead  
so promise me you wont leave my side

[bridge]

[chorus]  
we stay here tonight  
dont let them find us or were dead  
promise me you wont leave my side  
the warmest place to lye my head  
and when the sun comes up we fight  
dont let them find us or were dead  
so promise me you wont leave my side

[outro]  
(growls from the underworld)  
charge the gates  
with rust on there gears  
they seek destruction  
and kill the functions  
[repeat x8]
