She's staring at me I tried to ignore
She's coming closer, why am I so floored?
Don't want any trouble, But that's all you seem to bring
I train my eyes focused on the ground
Stay away from me girl, I can't have you around
What would your boyfriend say?

And how could you know?
How could you?

Whoa Oh Oh Oh!
You're the only one whose got me and nothings going
to stop me from
You Who Oo Oo!
Are you ever going to leave him, have I given you a
reason to?
Go Oh Oh Oh!
Can I be your distraction, Am I gaining any traction on
You Wo Oo Oo!
And I can't hold it all together, only thing that makes it
better is YOU!

Is this fun for you? Playing with my heart this way?
(You can't understand)
I'm broken down, I'm leaving town
But you know I'll be back and I won't change
I can't stay away not for the day
I'll find myself smack dab
Where I always fall back into all the things that you do
I can't quit you ever
So I'll carry on from dust till dawn
From now till forever

And how could you know?

Whoa Oh Oh Oh!
You're the only one whose got me and nothings going
to stop me from
You Who Oo Oo!
Are you ever going to leave him, have I given you a
reason to?
Go Oh Oh Oh!

Can I be your distraction, Am I gaining any traction on
You Wo Oo Oo!
And I can't hold it all together, only thing that makes it
better is YOU!

I tremble when I look at you
(Crazy how fast my feelings grew)
I know my timing is all but right
(I know he's got you wrapped up tight)
So I'll concede but won't move on
(I'll wait for you forever long)
You're hugs are full of chemistry
(But science never made any sense to me)

Take a breath, and let it out
'Cause on the inside, you can hear me shout.

And how could you know?
How could you?

Whoa Oh Oh Oh!
You're the only one whose got me and nothings going
to stop me from
You Who Oo Oo!
Are you ever going to leave him, have I given you a
reason to?
Go Oh Oh Oh!
Can I be your distraction, Am I gaining any traction on
You Wo Oo Oo!
And I can't hold it all together, only thing that makes it
better is YOU!
