"Stay"

Speaking of love now that's alright
But I feel you're hypnotized
You play your game
Making plans of leave alright
But i wont put up a fight
You'll have your way
But you should stay now
Stay and make it last
Stay now
Stay and make it last
Waiting for the moment
To get out of this place of you
Can ease your pain
Expecting everything to be
Just heaven when you are free
Step out of the rain
But you should stay now
Stay and make it last
You gotta stay now
You better stay and make it last
Stay now
Stay and make it last
Stay now
Stay and make it last
