Stars fall on the fourth of july it sounds like a war  
outside half mast '96 old glory's getting older ripped  
and torn apart desecrated seperated has this country  
been invaded she says warning your last warning  
network warning warning manufactured bombs in our  
basements in our bedrooms mail them off to ny city ok  
city it's a pity all the victims in the cities scenic artificial  
pride it's sounds like a war outside rockets over seas  
it's your captains one last order women children first  
she's going down going down pray your sins have been  
passed over stripes break up across the sky it sounds  
like a war outside it sounds like a war outside it sounds  
like a war outside
