

Essence Of Existence "The Experiment Theory"

The essences are on the rise, they devour the void of nothingness

I'd set this experiment to enjoy absolute experience

Molestation - the pain illusion. Confusion - unfocused vision

Odium - swallowed feelings. Depression - self pity mourning

Every alternative shall take place in my ultimate construction

To please me, the creator of the universe, the architect of perception

I am the reason, I am the source. I gave birth both thy creators thus thee

I am the beholder hidden in every entity. I enjoy what I have made, pleasures and aches

The world is me, I am eternity, everything that was, is and shall ever be

Love - the pleasure illusion. Certainty - brains adjusted.

Satisfaction - lethargy foundation. Ecstasy - a way to die

I am the destroyer of evenness, the uncertainty bringer, the keeper of existence

The creator of the universe, the architect of consciousness, slayer of unreality, I am the spring

I am the one, and you, you shall depart this life

To know me... maybe.
