I see your days and nights  
As time slowly fade away  
I know the things you have inside  
The pain you hide behind your smile

How many times has silence  
Made you a friend of mine

You turn away you don't wanna hear  
You don't believe your ears are deaf  
There's no retreat before you go  
Somewhere in distance  
I hear the voices crying out  
There's retreat before you go  
Further than the seas

I know you have chosen darkness  
To be your guide  
Pain in your heart and  
Death is by your side
