"Star"

Visit "[Star](#)" on MotoLyrics.com

You know I got to do this
I got to speak my mind
I got to tell you about how I
I came to be so fly
I went through drama like you
'Fore, I was all alone
It took a little magic
And now I'm on my road

Star
[Star, star]
Go, be a teaser
And I'll tell you yes
Baby, why do you would stay
You're a star
[Star, star]
Realize that there's so much more than this
Baby, why do you would stay

I told you I would do this
They said she won't be that
And now they tell me different
They like the way I step
They like the way I'm moving
They say they love my smile
I tell them get like it
Yes, they better do like I do

Star
[Star, star]
Go, be a teaser
And I'll tell you yes
Baby, why do you would stay
You're a star
[Star, star]
Realize that there's so much more than this
Baby, why do you would stay

I know you're tired of working
But stay up on your stuff
Push off for all the hurting

Even though it gets tough
With just a little magic
It's just a little fun
You're on your way to
What you always knew
You'd become a star

Star
[Star, star]
Go, be a teaser
And I'll tell you yes
Baby, why do you would stay
You're a star
[Star, star]
Realize that there's so much more than this
Baby, why do you would stay

Now I'm a star
[Star, star]
Go, be a teaser
And I'll tell you yes
Baby, why do you would stay
You're a star
[Star, star]
Realize that there's so much more than this
Baby, why do you would stay
