Quiet stranger
Eyes so soft they speak
He had me at hello
His scent it leaves me weak

C/o
Of all the places
He wound up at my door
Of all the cities
Why didn't we meet before

Hiding glances
I wish you'd catch my eye
For you I linger
The silent noise like trains collide
Help me swallow foolish pride

I can't explain this
I'm tired of stupid lies
I won't talk to strangers
But you make me break inside

Now I'm all awake inside
Come on and make things right 2x

Repeat c/o
