

Eternal "Good Thing"

Visit "[Good Thing](#)" on MotoLyrics.com

Could it be magic?
Could it be a fantasy?
Maybe I'm dreaming
'Cause it sure seems to get to me

You say that you want me
Say there'll be no one else
Make me no promises
'Cause we both know only time will tell
If this is real or just a moment in time?

We got such a good thing
(Good thing)
Ain't nothing coming close to this high
Doesn't get any better in this life

We got such a good thing
(Good thing)
Our bodies just melt into one
When we're loving each other it feels so right

Got such a good thing
(Good thing)
Got such a good thing
(Good thing)

From the beginning
It's like I could read your mind
I knew what you were thinking
When I looked into your eyes

You give me that feeling
(You give me that feeling)
That's keeping me warm inside
Now I'll be happy to stay by your side
'Cause we got something that is so hard to find

We got such a good thing
(Good thing)
Ain't nothing coming close to this high
Doesn't get any better in this life

(Got such a good thing)
We got such a good thing
(Good thing)
Our bodies just melt into one
(Baby, love me)
When we're loving each other it feels so right

Got such a good thing
(Good thing)
Got such a good thing
(Good thing)

Oh, baby
Come with me
All the signs say it was meant to be
Sometimes love is such a mystery
(Love is such a mystery)
But it seems so clear to me

Got such a good thing
(Good thing)
Got such a good thing
Got such a good thing
(Good thing)

I've got such a good thing
We got such a good thing
(Good thing)
Ain't nothing coming close to this high
Does it get any better in this life?

(Got such a good thing)
We got such a good thing
Our bodies just melt into one
When we're loving each other it feels so right

(Got such a good thing)
We got such a good thing
(Good thing)
Ain't nothing coming close to this high
Doesn't get any better in this life?

(Got such a good thing)
We got such a good thing
(Good thing)
Our bodies just melt into one
When we're loving each other it feels so right
(Got a good thing)
