Imaginary walls surround me  
And the silence embraces all my weeps  
All the images turn into shadows... of myself  
I'm breeding memories...I will not cry...again  
Infinite voices...why they drown me here  
All the words I hear are for sure...pure reality  
Voices...controlling my feelings  
Eternal kiss, touched my face  
Voices...healing my pain  
I am lost without you...  
Lights touched my eyes and petrified my tears  
Your last caress that I've been waiting...  
Am I dreaming or is this your hallowed place  
Because I'm feeling the cold of a last farewell...  
Voices...controlling my feelings  
Eternal kiss, touched my face  
Voices...healing my pain  
I am lost (without you...)  
Fading faces-angels crying beside me  
Guiding voices-where I will find you  
Where I will find myself...  
I am lost...where I will find myself?  
I am lost...where I will find myself?  
I am lost...where I will find myself?  
Where I will find you?  
Where I will find you?  
Where I will find you?  
So where I will find myself...
