# "Saving Spaces"

Visit "[Saving Spaces](#)" on MotoLyrics.com

I will save each word for you until each space is filled  
I'll redirect the path for you until you open up  
We fall so fast when there's no solid ground  
We fall so fast  
Simple words fill our heads  
The night becomes weightless  
Something is stealing the breath from my lungs  
Wish I knew what words to say to please you  
Wish I knew what words to say  
And you will save each thought for me until my head is  
full  
And you'll forget what you once said  
And turn your back on me  
I can't admit I let you down
