If since before we were born we fought against millions  
Just for a chance to reach the wall  
On a spearheaded long shot civilians

Ovulating lady  
May I ask you to dance

Wounded I came  
Lay beside me learn your name

Wounded I came

How don't we take it to go  
Face down down roll on missy  
Hey June Bug tow the line  
To Jupiter lead the way  
Pay first speak second  
Down on your knees third  
(Thirties and dirty these)  
All you've heard  
Women are prayer for him over there  
(Whim and a prayer for hymn over there)  
Carnal Gethsemene  
With her and me  
Since before we're born we fought against millions  
Just for a chance to reach the wall  
On a spearheaded long shot civilians ovulating  
And now and now  
We live amongst billions  
Underneath an ignorance pall  
That behavior is controlled by reptilian's brain
