"Now And Forever"

Visit "[Now And Forever](#)" on MotoLyrics.com

I don't know if I ever wanted
Now and forever
The things you said we wanted together
Too many nights I'd lie awake
Like a stranger
Listening to every breath you'd take
Feel so out of place there

I don't wonder what went wrong
But I wish your memory would leave me alone

Now and forever
And your voice just like a ghost
I sit alone in this empty house
Sent your little treasures back to where you're living
It comes to me
Chill passes through me
I packed your clothes and photographs

Guess now all's forgiven
Now and forever
I can't believe it's true
I thought I'd always be in love with you

My life goes on just like before
In and out of closing doors
I don't love it
But I learn to rise above it
She don't shout it
I found a girl now who will love me the way I want her to
We don't even talk about it

I can't believe it's true
I thought I'd always be in love with you
Now and forever
