Love can build you up
Love can tear you down
Love can change the world
This is what I found

Love can make you happy
Love can make you cry
Love can be the best
Till it's passed you by

Do you wanna, do you wanna
Do you wanna fall in love
Do you need it, can you feel it
Do you think you're strong enough

Can you take the highs
Can you take the lows
Can you handle everything love grows

Love can build you up
Love can tear you down
Love can change the world
This is what I found

Love can make you happy
Love can make you cry
Love can be the best
Till it's passed you by

If you want it, come and get it
Even though you know the score
I will love you, I will hate you
Then I'll love you even more

Can you handle love
Can you handle pain
Can you handle everything I'll say

Love can build you up
Love can tear you down
Love can change the world

This is what I found

Love can make you happy
Love can make you cry
Love can be the best
Till it's passed you by

Love will capture you whole
With your body and soul
Love is taking control of your senses

Love is guilty, is trialed
Love has no alibi
Love is breaking down all your defenses
Love

Love can make you sorry
Love can make you weak
Love can take you over
Even when you sleep

Love can give you heaven
Love can make you high
Love can make you cheat
And love can make you lie

Love can build you up
Love can tear you down
Love can change the world
This is what I've found

Love can make you happy
Love can make you cry
Love can be the best
Till it's passed you by
