Today I witness two hearts
Torn apart also by two hearts
You can see fumes of green all around
Sometimes you have to cover yourself up
So not to get infected
So not to get infected
Infected, yeah

It's amazing red can make you live
And at the same time turn you into green
It's amazing red can give you a reason to red
Although it depends on how green your red is

I saw a heart get crushed
On it's way to wither and dust
One heart was fully bloated
But inside it was slowly rotting
Stay away from the negative green
But sometimes it's hard not to

If you want a red that is true
Then sacrifice the green
Don't be like the four hearts
That played a game of red and green

It's amazing red can make you live
And at the same time turn you into green
It's amazing red can give you a reason to red
Although it depends on how green your red is

It's amazing red can make you live
And at the same time turn you into green
It's amazing red can give you a reason to red
Although it depends on how green your red is

Don't be like the four hearts
Don't be like the four hearts
