You were shining in a white light
Like a fairytale movie star
Never really thought I would find Snow White
drinking in a downtown bar
You were underneath the white light
Like a vision in a deep dark place
Never really thought I would fall for a country girl
with an angel's face

Aww everything fades away
The world changes every day
When I think about you, it makes me want to sing
Glorious
Yeah
Glorious
You are glorious

We were walkin' in the white sun
We were growing up and throwin' down loud
There was silver in our eyes and we didnt know why,
a power in the north so proud
We were lost inside a long dark summer
We were runnin' down a nowhere road
We were looking for a light in the middle of the night,
a place that felt like home

I know everything fades away
The world changes everyday
When I think about you, and what we had,
it makes me want to sing
Glorious
You are to me
Glorious
Yes you are to me
Glorious

I know this glorious life has never been what it seems
I was asleep when I was living the dream
(living the dream)
Living the dream
I know I was living the dream

Yeah I think about the time in the city
We were runnin' away trying to live free
I could never believe that you wanted to be with me
We would wait in the cold for the last bus home
Sleeping with your arms around me
The world is never what it seems to be
I was living the lie,
when I should have been living the dream

Glorious
I should've been living the dream
Glorious
I know I should've been living the dream
Glorious
I know I never understood how much you mean to me
Now I know I was living the dream
Glorious
I know I was living the dream
Glorious
I know I know I was living the dream
Glorious
I know this glorious live has never been what it seems
to be
I was walkin' through life asleep when I was living the
dream
