Now

Never been here, never coming back
Never want to think about the things that happened
today
Wanna lay down on the warm ground
Think I'm gonna need a little time to myself

Don't fall down now, you will never get up
Don't fall down now, don't fall down now
Don't fall down now, you will never get up
Don't fall down now, now

I ask you for a slow ride
Going nowhere, you look like Satan
You ask me if I want to get high
Couple of bags down in old town
You tie your arm, ask me if I wanted to drive

Don't fall down now, you will never get up
Don't fall down now, don't fall down now
Don't fall down now, you will never get up
Don't fall down now, now, now

Last thing I recall, I was in the air
I woke up in the street crawling with my strawberry
burns
Ten long years in a straight line, they fall like water
Yes, I guess I fucked up again

Don't fall down now, you will never get up
Don't fall down now
Don't fall down now, you will never get up
Don't fall down now

Don't fall down now, you will never get up
Don't fall down now
Don't fall down now, you will never get up
Don't fall down now, now, now, now
