All the people that you know, they say you're ready to
break down

All the people that you know, they say you're ready to
fall

I hope you know that you are better than you think you
are

I hope you know you that you will never really try

I hope you know you that you are never unknown

You got a good friend on the inside

Whoa oh

I just want to be there when you need

To find your feet on the solid ground, whoa oh

I just want to catch you when you fall down

(When you fall down)

All the people that you know say you live in a white
noise

Yeah, all the people that you know they say you're
living in hell

They don't know anything

I hope you know that you are better than they say you
are

I have to say that you are stronger than you know

I have to say that you are smart enough to handle any
stunt

That anyone could pull

Whoa oh

I just want to be there when you need

To find your feet on the solid ground, whoa oh

I just want to catch you when you fall down

Catch you when you fall down

Catch you when you fall down

Catch you when you fall down

I want to catch you when you fall down

When you fall down

All the people that you know, say you're ready to break

down

All the people that you know, say you're ready to fall

I have to say that you are better than they think you are

Have to say that you are better than them all

Have to tell you that you have an easy answer

When you need someone to call

Whoa oh

I just want to be there when you need

A hand to help you turn it all around

Whoa oh

I just need to be there when you feel

Like you just need to come down

Woah oh

I just want to be there when you need

To find yourself on the solid ground

Whoa oh

I just want to catch you when you fall down

Catch you when you fall down

Catch you when you fall down

Catch you when you fall down

I want to catch you when you fall down

Catch you when you fall down

Catch you when you fall down

Catch you when you fall down

I wanna catch you when you fall down
