

Everly "Flying Machine"

Visit "[Flying Machine](#)" on MotoLyrics.com

Be safe and close darling
Your heart is precious to me
When you are exploring
Remember all you see
Is only the view of the world
From your flying machine

So distant you wander
You've lost your way it seems
Pretending you're happy
Nodoby else believes
You're ever going to come down
From your flying machine

These days you are keeping
Distinguished company
The blackbird, the robin
The tiny honeybees

I miss you my lover
You're gone through space and time
To search for another
Won't you come back and be mine?
Leave all the madness behind
From your flying machine

Everybody wants your magic elixir
Mix her and fix her
Oh, that's a trick, sir
Hold on to your hat
Watch off the black cats
All this bewitching has taken my lover away

Your heart is precious to me
When you are exploring
Remember all you see
Is only the view of the world
From your flying machine!
