"Follow The Sun"

Visit "[Follow The Sun](#)" on MotoLyrics.com

Come in close to the fire now
I want to see you a little brighter now
So take my hand as we turn to the wind and don't let go
We walk a world that's turning love
The destination is the journey love
So take my hand as we turn to the wind and don't let go

Let's follow the sun until the shadows fade
Cross the desert till we find our place
Think of where you're going not where you've come
from
Just lift your eyes and follow the sun

I saw you in a dream last night
Amongst a crowd of black and white
And as you smiled colors burst into life and shadows
go
I couldn't turn this heart to stone
And banish all of my feelings I've shown
Through thick and thin, rain and wind
Darling you won't be alone

Let's follow the sun until the shadows fade
Cross the desert till we find our place
Think of where you're going not where you've come
from
Just lift your eyes and follow the sun
