This road just keeps on going, I know it's a road to
nowhere now
And I can't turn round
This load upon my shoulders, no hope that I can soldier
on
And it weighs me down, and it weighs me down
Till I begin to drown, that's when you pull me out

That's the way it always comes around

Can't stop this roller-coaster
You're on top and the only way is down
To meet the rising ground
Can't stop even though you want to
You're on top and you're trying not to look down
As your ship goes down, and as you start to drown
You see a hand reach down, and then I lift you out

That's the way it always comes around

That's the way, that's the way
That's the way, that's the way
Hold me, darling let's be clear
Down here, we got all we need
If we all get together then we've got nothing to fear

That's the way it always comes around

That's the way, that's the way
That's the way, that's the way
That's the way, that's the way
That's the way, that's the way
That's the way it always comes around
That's the way, that's the way
That's the way it always comes around
That's the way, that's the way
That's the way it always comes around
