Chorus

Coming harder ain't looking back
Feeling stronger ready to launch the attack
Do you remember when we were the cream of the crop
They stole our bible and the carbon we got

They took us away from Africa
With an intention to kill our culture
But through the power of the most high
Our mental capacity get wider

Help your brotherman from out of the slum
It's no crime
If blood haffe run
To liberate yourself you have to eliminate some

Emancipate your mind from slavery
I know one day Jah will set us free
Some have been brainwashed got tricked easily
Forget all their friends and their family
