Losing my dreams in the darkness within

Have you ever had a vision  
That evoked the spirits of despair  
They will sever me from it all  
I might be blind but I know what I feel  
Hear no evil, see no evil  
Or be forever doomed

Losing my dreams in the darkness within  
And now my soul is fading fast  
I never thought the pain would last  
Nothing can gleam in my darkness within  
Forever black, a state of mind, a way of life  
Just a different kind

Are you clever or just pretending  
How can you stand to feign what is not  
I could never fake who I am  
My mental picture of the future is dusk

Hear no evil, see no evil  
Or be forever doomed

Losing my dreams in the darkness within  
I'm losing all my dreams, my soul is fading fast  
I never thought the pain would last  
Nothing can gleam in my darkness within  
Forever black, a state of mind, a way of life  
Just a different kind

Caught in between where nothing can gleam  
And a place that holds a ray of light  
Surrounded by a solid night  
Oh stay away, the solid night  
Oh, stay away  
Losing my dreams in the darkness within  
Nothing can gleam in my darkness within  
Forever black, a state of mind, a way of life  
Just a different kind
