I wanna get you
One of these nights
When the lights are off
An' keep out from my coat,
An' keep out from my coat a gun
I'll kill you in the street
Then I'll begin to run away
'Cause I only want to kill you
With my hands
When the lights will return
They'll find a body
Killed

I still remember
That night that you come in
The noise coming from your car

And that pretty face of a little scared girl
I'll kill you in the street
Then I'll begin to run away
'Cause I only want to kill you
With my hands
When the lights will return
They'll find a body
Killed

Hey
Do you think you deserve to live?
No 'Cause your death began
When you destroyed her love
When you destroyed her life
